

GRP Cabinets – GRP Kiosks

Captrad produce a wide range of GRP Cabinets, GRP Kiosks and GRP Enclosures – we supply a wide variety of industries, (water, power and gas), construction, petro-chemical and fire sectors throughout the U.K and N. Ireland.

Recognising that in today's age we are constantly faced with increasingly tight dead lines and first class quality, we are able to offer complete turnkey packages with regards to Design and Build of enclosures and cabinets to your requirement.

Services Offered

Sizes:- No matter what size your project is, we can supply to your needs. Everything that we do is totally bespoke; we can therefore accommodate any size, configuration and shape of cabinet enclosure such as a small metering cabinet to a larger GRP kiosks and bespoke enclosures. We also have a standard range of cabinets which we can turn around efficiently

Materials

Depending on your requirement, we can offer various core materials within the GRP structure to achieve greater U-Values (thermal performance); various Fire Ratings from 1/2hr to 1hr or different core to reduce noise levels and attenuation. Our engineers can discuss with you the best materials to fulfil both your brief and possibly your customer's constraints. Samples can be produced and supplied free of charge.

Finishes

Our standard finish to our buildings is either gloss or textured to any BS4800 or RAL Colour. We are also able to offer further finishes such as Brick effect, Stone, Ship Lap Timber, together with Welsh Slate roof effect or Tile. Simply forward a photo or sample to us and we'll produce a GRP replica sample for your approval, free of charge. No fuss and hassle free.

Design and Project Management

Each of our customers regardless of order value will be treated with the highest of regards and priority. Every order we receive will have our full design and CAD service free of charge. This will include a general arrangement of the building and base slab details. During your order process, a more detailed drawing can be made showing items such as electrical installation, cable tray work, steel base arrangements, ventilation etc. and submitted for your approval. Prior to your delivery and if you have opted for our installation on site, all Method Statements and Risk Assessments will be submitted for your approval. A Project Manager will be assigned to your project until the final sign-off sheet has been signed and shown to be satisfied with the service received.

Site Installation

We are able to offer full site installation and fit out throughout the U.K and N. Ireland and all our installers hold a minimum CSCS. All our Electrical Engineers are also NIC/EIC registered.

Delivery

We offer HIAB deliveries on any enclosure over 2m x 1m x 2m high which can be dropped directly onto your slab. Enclosures wider than 4m may be delivered in panel form in which case will require erection and sealing on site. Smaller cabinets may be delivered on pallet's providing the customer has the facility to offload.

Crane Service

In some cases where the enclosures are either too large or heavy for the HIAB, or location is an issue, we can offer a crane facility, also offering full contract lifts and insurances.
