

GRP Access Ladders

Fiberglass Access Ladders are designed to provide permanent access with safety even in the most difficult environmental conditions. It offers a direct replacement/alternative to conventional metal ladders at economical pricing. Fiberglass Ladders are fabricated using primarily our standard range of structural profiles

Main advantages for using these fiberglass ladders:

- Ease of installation due to light weight material
- Very little if any maintenance
- Price competitive with most materials
- Designed and tested to BS/European standards

Configuration

Captrad's Range consists of two primary types of Fiberglass Access ladders:

- Man Hole Access Ladders
- External Access Ladders
