Captrad's Trolley Shelters are manufactured in a variety of styles to blend in to any surrounding environments. Our trolley shelters can be manufactured in a variety of grades of metal to suit the budget requirements of the end user.

Our Trolley Shelter is designed to fit in a standard car parking space. We can also supply the trolley shelter in a back to back design thus increasing the number of possible trolley bays.

Constructed from mild steel frame and 5mm PET sheeting supported every metre for added strength and durability.

Specification

- A single shelter is suitable for approx 36 standard trolleys.
- Framework 60x40mm mild steel hollow section, galvanised finish. All steel parts are galvanised to BS EN 1461:1999.
- Cladding: 5mm clear PET sheeting externally fixed to frame and retained by clamping strips.
- Galvanised finish is standard.
- Colour coated finishes are available extra.
- Adjustable flanged feet for bolting down (bolts are available extra).
- Size: 2200mm overall height.
2210mm overall width.
4220mm overall length.
- Lower rail is 750mm above ground.
