

Covered Walkways & Canopies

Captrad's covered walkways are designed to keep the users dry and safe from the elements of the weather and also provide protection from sun rays, using UV stable polycarbonate/PET sheeting, this also allows light in.

Covered walkways and covered canopies can be designed to include guttering systems to ensure rainwater is directed away from the shelter or can let the rain drain naturally

Captrad can also offer a bespoke Covered Walkway Design service

Following a detailed meeting this will allow our designers create a bespoke Covered Walkway or canopy to meet your design brief, if required we can have a drawing produced to meet all your requirements thus producing a detailed specification.
