

Captrad Ltd produce GRP/ fibreglass platforms in-house to help supply safe access to areas such as train maintenance facilities, power plants, chemical access bunds, train driver walkways plus much more. Ideal for industrial settings, each of our GRP platforms are made to meet all relevant standards, including BS 4592, offering you a safe and reliable way to work.

Our GRP platforms have a non-slip grp gritted surface which works well in any environment and meets BS standards in relation to anti-slip. GRP platforms are non-conductive, non-corrosive and very easy to clean, making them the excellent choice for any application,

What are the benefits of opting for GRP platforms and walkways?

Platforms and walkways are crucial pieces of kit for a wide range of workers and are critical for the safety of staff on industrial sites. But – when it comes to GRP platforms, you can benefit from much more than just your standard secure platform. In fact, the benefits vary and include:

- Very Low maintenance requirements
- Long-lasting and durable
- Low thermal conductivity
- High impact resistance
- Easy installation
- Lightweight for easy manoeuvre when required
